Highlights

6 ft of extra cable length

6 feet of extra cable length extends the length of your existing cable and gives you much more room to organize your workspace.

Quality construction

Quality construction uses only top grade materials to create products of extended durability.

Gold-plated connectors

Gold-plated connectors provide better conductivity by lowering contact resistance. They also prevent connector deterioration through oxidation.

Corrosion-resistant connectors

Compressed brass with 24K gold-electroplated connectors creates a secure and extremely durable connection that optimizes signal quality and delivers the best picture and data transfer.

Flexible PVC Jacket

Flexible PVC jacket provided protection to the delicate core of the cable. It also offers extended durability and ease of installation.

Molded ends

Molded ends prevent fraying and extend the life of your cable.

Molded thumb screws

Easily turn the connectors with your fingers. No screwdriver or tools are required.

Rubber strain relief

Rubber strain relief provides a secure, yet flexible juncture between the cable and the plug.
